Solutions pour Stalles – Par System Fencing

System Fencing has a complete line of stalls to meet all of your needs!

With so many options when choosing stalls for horses, things can sometimes be confusing; at System Fencing, Stalls & Equipment we make it easier. All of our horse stalls are made with attention to detail, excellence of craftsmanship, and designed for the safety of your horse. Whether your horse is stalled only for a short time each day in one of our Portable Horse Stalls, or lives mostly inside in a Designer Stall, it's important to have the peace of mind in knowing that they are safe and comfortable. There are many factors to consider when selecting the right horse stall system for you and your horses. Our trained staff is here to answer your questions and provide decades of experience with finding the right horse stall, stall supplies and other equine products for your barn, facility, or equestrian center.

Whichever stall system you choose, you can be sure that System Fencing will be with you every step of the way. We provide detailed installation instructions and technical support for helping to ensure that your project is completed to your satisfaction. Whether you are a 2 stall private barn or a 60 stall boarding facility, our top selling systems can be made to work in any situation. Electro Galvanized, hot dipped galvanized or powder coated to your specifications. Cost effective solutions from pre-engineered kit systems that get assembled on site to Welded Systems that install quickly and withstand the harshest stall environments.

Choisir la bonne stalle

CHOOSE THE RIGHT STALL SYSTEM...

They all look the same! When looking for a durable and dependable stall system you must consider a number of factors. What does the kit include? What type of finish is on the stall system? How much labour am I going to have to put into the stalls after I receive them? What is the bar spacing or what level of safety do I want for my horses? How quickly do I need them?

The Standard and Welded systems all require posts for installation. Standard Stalls are a put-together system and will fit most applications. This System comes complete with

all the components to put up a great looking stall front or partition. The components are shipped out in boxes making for cost effective shipping. Welded Stalls are available in Hot Dipped Galvanized or Powder Coated Finish available in a variety of colours. Welded Stalls are quick and easy to install and welded for strength for high use applications and boarding facilities. These stalls are ideal for situations where a variety of different people and horses are entering and exiting the stalls.

DURABILITY...

The System complete line of stall systems is one of the most durable on the market.

Whether you choose the electro galvanized kit system, the hot dipped galvanized or one of the stunning powder coated colors, we will tailor a system to your own personal needs.

WHERE DO I BEGIN?

Whether you're building a complete new facility or a renovation you need to start with a plan. Ask

yourself how much you want to do, based on your needs, requirements and budget. Talk to other horse people, friends and look at magazines for ideas and inspirations for your farm.

RECOMMENDED HORSE HOUSING DIMENSIONS (minimums)

Box stall (horse)	12 x 12 ft
Box stall (pony)	10 x 10 ft
Standing stall	5 x 12 ft
Stall door width	4 ft
Stall door height	7 ft
Stall Ceiling height	10 to 12 ft
Stall wall partition	8 ft

Centre aisle width	12 ft
Floor area per horse	150 ft ²
Airspace per horse	1553 ft ³

Feed and Water:	bucket / water source
height:	just above horse chest
.....	height at nose level

Lighting	recessed or protected and
.....	out of horse's reach

Ventilation for naturally ventilated building:	
outlet area per horse*	1.08 ft ² **
inlet area per horse*	3.23 ft ²

*note: insulated stable can have slightly smaller inlets and outlets

**note: may only be suitable for smaller buildings - for larger buildings: general rule: 1 to 1.5% of floor area = area required for an open ridge ventilator

Hay and Bedding store in separate building from stable

(note: guidelines only - dimensions can vary depending on type of horse housed, management style used and facilities available)

Equine Guelph is the horse owner and caregiver's centre at the University of Guelph. Equine Guelph is dedicated to improving the health and well-being of horses through the provision and promotion of research, performance and education.

Our top sellers...

Make the right decision with our Standard or Welded Stall systems. If you are retrofitting, renovating or building a new construction, these systems will work in most projects. Posts are required and many accessories are available.

Perception is Everything...

If you have ideas, we have the solutions. Perception is everything with the custom made stall systems. Custom bending, grills or mesh, brass fittings and our highest quality craftsmanship make these stalls worth the investment. From Design to Completion.

No Posts Required...

Do you have a free span barn or an old drive shed? These stalls are installed quickly and have no edges that horses can chew. Many options are available such as matching partitions, galvanized or powder coated finishes, and taller 7.5' height making this system a great addition to any facility.

Ease and Time saving...

Racetracks, Fairs and Expos require ease of set up along with durability. These stalls will safely contain the horse and create a wonderful look for your show. Racks are available for transportation and storage and choosing this system for temporary situations will save you time and money.

TESTIMONIAL

"We built our new equestrian facility last year in Shediac Cape N.B. The help and support we received from System Fencing was phenomenal. We purchased Dutch Doors, Dutch Windows, Standard Stalls and Stable Comfort Mats. The Feed Doors in our new stalls make feeding time a breeze and our beautiful horseshoe handles complete the stalls with style. The Stable Comfort Mats reduce bedding costs and if the horses could speak they would tell you that they are very comfortable. System Fencing was there to help with all our needs and questions. The delivery of the products always met our schedule even when we ordered at the last minute. Today our facility is complete and looks great thanks to the service and products we purchased from System Fencing."

TESTIMONIAL

"When my wife and I decided to renovate our old barn for horses, we started looking for a company to purchase all of our needs. What we thought would be a long, difficult process, turned out to be an easy, fun task. System Fencing was great. Their knowledge of products, advice, attention to us and pleasant manner had us driving away from Rockwood saying to each other: well, that was most pleasant. All items were delivered on time as promised. Thanks to System Fencing, we have a beautiful and functional re-modeled

The Ultimate Panel Stall System! Posts or No Posts!

Our panel stalls have quickly become our most popular design... simply for its versatility. Excellent choice for buildings without posts or are also easily installed in between posts. Installation is a breeze with this system, as they simply connect to posts or together with our heavy duty connectors. First to offer a 7'6" stall height, System has always been the industry leader in providing you with a superior panel or portable stall. Don't be fooled by imitations, these exclusive stalls include an enclosed 8ft round track with easily adjustable round trolleys for a smoother rolling door for years to come. Each stall is manufactured on-site here in Rockwood, ON. We can offer a variety of custom sizes and are able to create the design of your choice.

TESTIMONIAL

"We went to System Fencing because of what we had seen in other equestrian facilities and had been most impressed with all of the selection of different products and the high quality of workmanship. Today, we have a barn full of impressed clients, as well as beautiful, large, safe stalls we are proud of. We also had the benefit of the most enjoyable purchasing experience, while making a very large investment. The communication between our sales rep. could not have been better. Every phone call, every email, and every fax with any questions I had, was answered quickly, professionally and with a caring attitude. From beginning to end, System Fencing was there to make recommendations and suggestions. They are still helping today, even after all of the major purchasing has been done. They helped save us money and time on every aspect of our project. Honestly, I could not suggest any improvements from our experience. I will not shop anywhere else for any of our stabling needs. I have never been treated better and their service is second to none. I would recommend System Fencing to anyone

Installation is a breeze with this system, as they simply connect to posts or together with our heavy duty connectors. First to offer a 7'6" stall height, System has always been the industry leader in providing you with a superior panel or portable stall. Don't be fooled by imitations, these exclusive stalls include an enclosed 8ft round track with easily adjustable round trolleys for a smoother rolling door for years to come. Each stall is manufactured on-site here in Rockwood, ON. We can offer a variety of custom sizes and are able to create the design of your choice.

TESTIMONIAL

"We went to System Fencing because of what we had seen in other equestrian facilities and had been most impressed with all of the selection of different products and the high quality of workmanship. Today, we have a barn full of impressed clients, as well as beautiful, large, safe stalls we are proud of. We also had the benefit of the most enjoyable purchasing experience, while making a very large investment. The communication between our sales rep. could not have been better. Every phone call, every email, and every fax with any questions I had, was answered quickly, professionally and with a caring attitude. From beginning to end, System Fencing was there to make recommendations and suggestions. They are still helping today, even after all of the major purchasing has been done. They helped save us money and time on every aspect of our project. Honestly, I could not suggest any improvements from our experience. I will not shop anywhere else for any of our stabling needs. I have never been treated better and their service is second to none. I would recommend System Fencing to anyone wanting the best service, products and quality!"

- Offers excellent socialization
- Add decorative brass finials
- Hot-dipped Galvanized or Powder Coated Finish
- Wood not included

STANDARD GRILLED PARTITION

For an economical standing stall partition, choose the standard grilled partition (page 57). Required posts.

TESTIMONIAL

About a year ago, we decided to upgrade and add to our riding establishment. After doing some research and looking at a number of different products available we decided that the System fencing stalls appeared to be the most affordable and best quality. Their catalogue provided great pictures and explanations and we had spoken to the sales rep at a horse show who was very helpful, even though we had not decided, at that time, what product we would be using.

Once our decision was made to use the system fencing stalls, dealing with them was a very pleasant experience. They provided useful information in a very timely manner and was helpful in all regards. There was a no stress attitude that was greatly appreciated and always friendly but professional. Communication was very straightforward and understandable. All our questions were answered promptly and politely. The delivery of the products was on time and affordable. Our contractor had no problem installing the stalls and they have been working perfectly since we began using them. We love the appearance of the stalls and the horses seem very happy to be out of the cold.

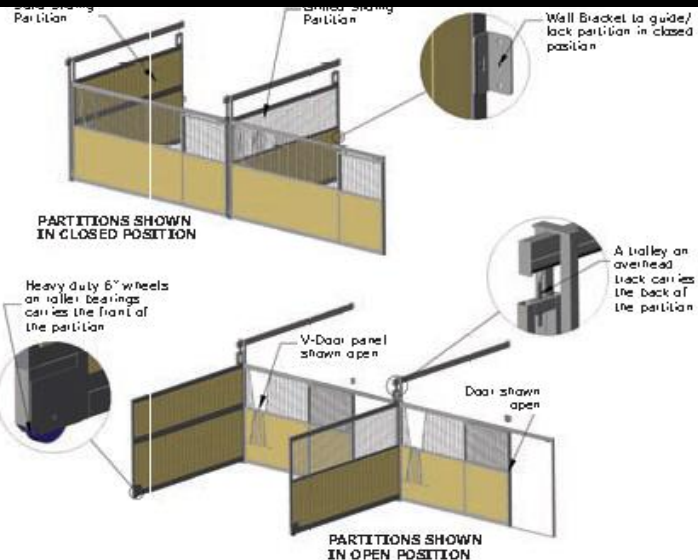

Everything about our experience with System fencing has been a positive one and I would strongly recommend this company to anyone with utmost confidence.

Chris Windover & Frank Duguay - Twinpines Equestrian Centre, Russell, ON

Partie Mur Coulissant

Innovative design allows all of the partitions to be rolled into the aisle way and stalls to be mucked out with a small tractor or skid steer. Available in 10' or 12' designs. Swinging partitions also available. Call for pricing today.

BEAUTY & STRENGTH OF WOOD

Choosing a wood for your barn is as important as choosing the right stall system for your horses. You want something to last for years to come with the least amount of maintenance and, as importantly, gives you that classic finish. At System Fencing, we suggest Tongue & Grooved Ash lumber for your stall fronts, outside walls, and partitions. This T & G wood will stand up to the hardest of abuse while enhancing the appearance of your barn. For the ceiling, we suggest T & G Pine. You may choose to use a clear coat to heighten the beautiful grain that these woods are known for or have your heart set on a beautiful stain. Always check with your paint or hardware store to determine what stain is best to use for the safety of your horses.

TONGUE & GROOVE ASH

White Ash Stall Lumber: Excellent material for all stall walls, back walls or anywhere with horse pressure.

- Dried to 16-18% moisture to help reduce shrinkage
- Tongue & Groove with V-Joint
- Stains to an amazing grain finish
- Hardwood to help stop chewing
- 2x6 nominal planed to 1 7/16" x 5" coverage

Call for our stall lumber kits, figured out and ready to be supplied with our stall kits.

2"x6"x10'

Item #: WASH2610TG

2"x6"x12'

Item #: WASH2612TG

PINE LUMBER

Pine ceiling and wall lumber: Excellent decorative material for ceilings and wall heights above 8'. Pine is a softwood material and not recommended for areas that come into contact with horses.

- Dried to 16-18% moisture to help reduce shrinkage
- Tongue & Groove with V-Joint
- Stains to an amazing grain finish
- 1x6 nominal planed to 3/4" x 5"

Simply supply us with the amount of surface area that you would like to cover and we can figure out how much material you will require.

Supplied in Random lengths.

Stalle Libre Portative

SYSTEM
MADE

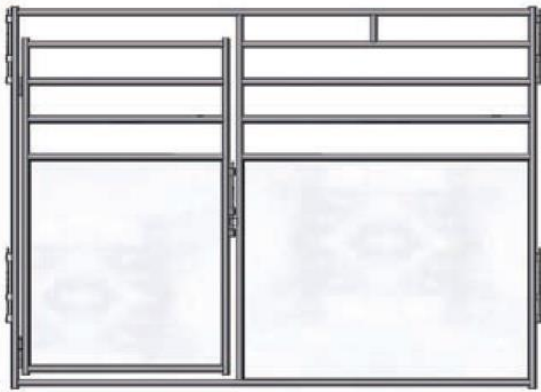

- Quick, easy setup & take down
- Strength & durability
- Light weight - Portable & versatile
- Stackable for easy transporting
- Puckboard can be supplied
- 7' 6" height - 10' length
- Hinged or sliding doors
- Hinged front on Racetrack models
- Easy to clean

Choosing the right stall system will allow you to set up for that next show and take down from the previous one in a matter of hours instead of days. Everything you need to set-up this stall system is included, except the space. This light weight durable stall system is quick to setup and take down. This converts into a money saving investment.

We are continuously working with some of the Nation's top trade shows and racetracks to design systems for their specific needs. Give us a call to quote your next facility.

TESTIMONIAL

"Many thanks System Fencing! Without System Fencing our "state-of-the-art" Dressage Facility would not have been the establishment which it is. We know that our horses are secure in their stalls and paddocks. The communication levels have been excellent at all levels as they worked with us, listened to our needs and gave good realistic advice. Keep up the good work and you will always be our "No # 1" choice in the future."

TESTIMONIAL

"We decided over a year ago that our barn needed an upgrade, including the stalls that were more than 20 years old. After doing plenty of research, we found that System Fencing had all the options and expertise that we were looking for. System Fencing superior knowledge in manufacturing made designing and installing our Custom Stalls a breeze. We highly recommend System Fencing for the quality of the products they provide and their level of service both before and after the sale."

Stalle Libre - Tuscany

Customize these Designer Stalls to your needs!

Deerfields Stables, Palgrave, ON

Our Tuscany stall systems were inspired by that classic European look. This open-concept stall offers excellent ventilation and socialization and is custom built for each customer. This designer stall system can be built to stand alone (with steel posts), or can attach to existing posts in your barn.

You choose the options you'd like including the hot-dipped galvanized or powder coated finishes. Add feed openings, full-grill doors, cross-bucks, or brass, chrome, or powder coated finials. Choose horizontal or vertical wood in your fronts.

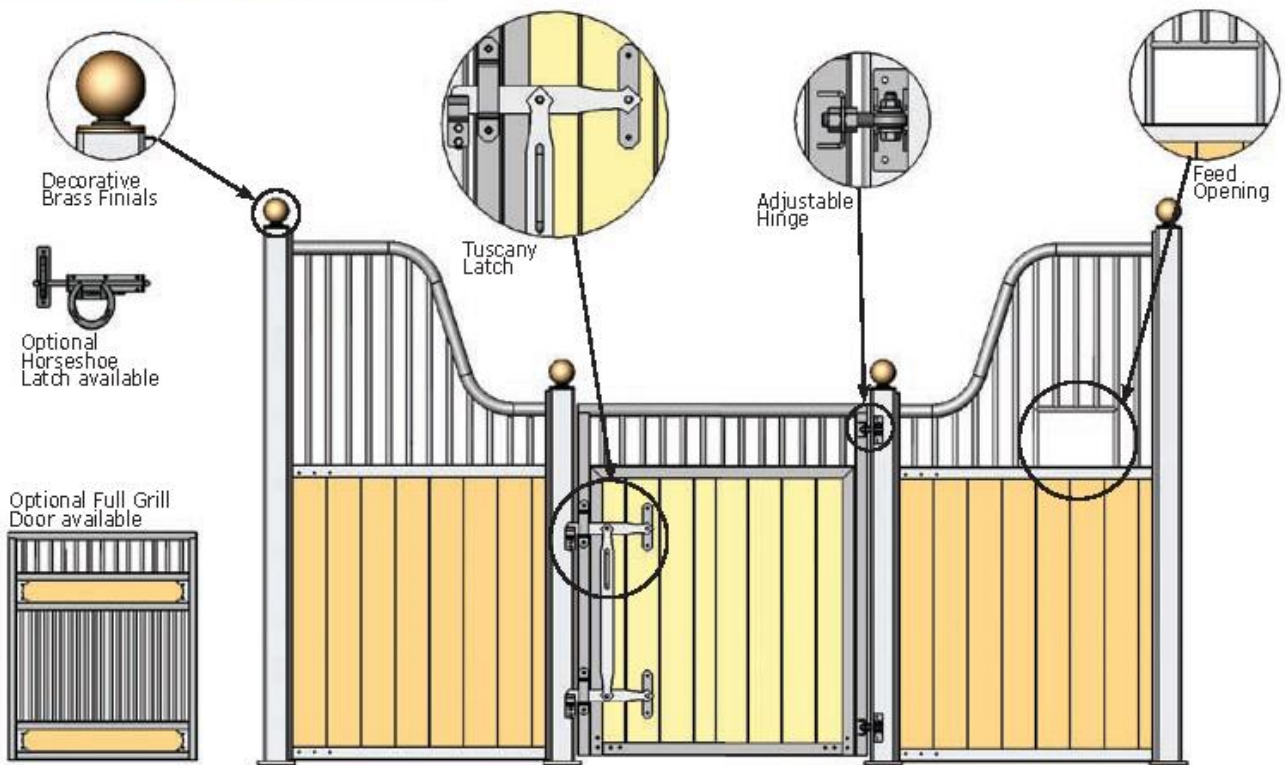

We can custom design the Tuscany style with any idea that you have: either with wood or brick to create a unique style. Remember, perception is everything when presenting your horses to your clients.
